Will the Vatican build a solar plant in 2024?

In 2024, the Vatican announced a new solar plant to be built on Church-owned land outside Rome, positioning the city-state to become the eighth country in the world to run entirely on renewable electricity. The project will also include agricultural activity, creating an "agrivoltaic" site that combines solar energy production with farming.

Does Vatican City have solar power?

Yes. Vatican City has joined Albania, Bhutan, Nepal, Paraguay, Iceland, Ethiopia and the Democratic Republic of Congo to become one of just eight countries in the world to generate 100% of its electricity from renewable sources. Several church organizations around the world are making the move to solar.

Does the Vatican have a low-energy lighting system?

The Vatican has introduced low-energy lighting systems; over 100,000 LED lights have replaced older fixtures, cutting energy consumption by up to 90% while protecting delicate frescoes from heat exposure.
