## Which departments are there in Nepal's power base stations

What is Nepal's power system?

It is responsible for most of Nepal's electricity generation, dispatch, transmission, distribution, and retailing. It operates hydropower plants with a total installed capacity of 407 megawatt (MW), two diesel plants with total installed capacity of 53 MW, and two small (50 kilowatt, kW) solar power facilities.

How many power plants are there in Nepal?

Six of the country's seven provinces generate hydropower as their main energy source, while Madhes Province generates solar energy. While NEA (Nepal Electricity Authority) and its subsidiaries own and operate 20 generation stations, the remaining are owned and operated by Independent Power Producers (IPP).

Does Nepal have a power sector?

There has been private sector participation in the Nepal's power sector since 1992, under the Hydropower Development Policy 1992<sup>1</sup> and the Electricity Act 1992. In 2001, the Government approved a Hydropower Development Policy<sup>2</sup>.

Why does Nepal have a decentralised power system?

The well-known cancellation of Arun III in 1995 and the availability of alternative models led to Nepal's decentralised power development. It matters that this distributed generation and storage of electricity is close to the point of use.
