
Wholesale lv switchgear panel in Angola

Why should you choose MV/LV switchgear panel manufacture?

As MV/LV Switchgear panel manufacture, we offer the confidence, reliability and peace of mind that come with experience and commitments to customer satisfaction.

What is a low voltage panel?

A low voltage panel is an electrical distribution system through which electrical power feeds divides into a branch circuit and provides a protective fuse. Electrical equipment that uses only 50 volts of electricity is comprised of a low voltage panel.

What is the difference between LV and MV panels?

LV panels handle voltages up to 1000V AC, while MV panels manage voltages from 1kV to 36kV AC, catering to diverse industrial and infrastructure needs. JV Power Technologies' panels adhere to international standards, emphasizing safety and performance.

What is a vacuum switchgear system?

It is a standalone vacuum switchgear system with built in self-driven independent control supply for self-tripping & closing of CB. The product is well equipped for metering, control, protection & SCADA compatibility. It is a highly sought product in the utilities distribution segment.
